HISTORICAL NOTICE.

On the 23rd December, 1878, a Royal Commission was appointed to inquire into and report upon the operations of the University of New Zealand and its relations to the Secondary Schools of the Colony, and upon the best means of bringing secondary and higher education within the reach of the youth of both sexes. The Commission in its report, under date 9th July, 1879, among other things, recommended that the inequality in the educational institutions of the two islands should be removed by establishing, at the most important centres of population in the North Island, Colleges capable of supplying an education of the same standard as that provided by the University of Otago and Canterbury College, and proposed that the Government should invite the Legislature to make immediate provision for the establishment of two Colleges, one at Auckland and the other at Wellington.

For the maintenance of these two Colleges the Commissioners suggested that the Government should utilise the reserves set apart for the promotion of higher education in the Provincial Districts of Auckland and Wellington, and that the two Colleges should be respectively endowed with Crown lands sufficient to provide an immediate income to each amounting to £4,000 per annum; that, if this were not practicable, the deficit in each case should be made good by a pecuniary grant.

A College was established in Auckland by "The Auckland University College Act, 1882."

Nothing was done for Wellington until the year 1894, when an Act was passed entitled "The Middle District of New Zealand University College Act, 1894," which said "There shall be established in the city of Wellington a College to be connected with the University of New Zealand"; and provision was

made for a governing body, to be called the Council, but no provision was made for any pecuniary grant or endowment. Certain members of the Council were appointed, but nothing could be done for want of funds.

In the year 1897, the Right Hon. R. J. Seddon, P.C., Premier of the Colony, introduced into Parliament the Victoria College Act; an Act, as stated in the preamble, "to promote Higher Education by the establishment of a College at Wellington in commemoration of the sixtieth year of the reign of Her Majesty Queen Victoria," the College being intended to embrace in its work the Provincial Districts of Wellington, Taranaki, Hawke's Bay, Nelson, Marlborough and Westland. The Act was passed on the 22nd December, 1897, the Council was formed, and the work of organisation was begun. The Act provides for the payment out of the Consolidated Fund of a grant of £4,000 a year, and out of this sum the Council was required to give six scholarships each year, called "Queen's Scholarship," to persons of either sex under the age of 14 years upon the results of an examination under such conditions as the Council may prescribe. In 1903 an amending Act was passed providing for six Junior and four Senior Queen's Scholarships. In 1906 the College was relieved of the payment of these Scholarships. By the Education Act Amendment Act, 1907, the Queen's Scholarships were abolished. The Act of 1897 further set apart a parcel of land 4,000 acres in extent in the Nukumarū Survey District (Wellington Provincial District) as an endowment for the College.

The Council decided to begin by the appointment of four Professors for the Chairs of Classics, English Language and Literature, Chemistry and Physics, and Mathematics and Mathematical Physics, and the following were appointed:—Classics, J. R.

Brown, M.A., St. Andrews and Oxford; English Language and Literature, H. Mackenzie, M.A., St. Andrews; Chemistry and Physics, T. H. Easterfield, M.A., Cambridge, Ph.D., Würzburg; Mathematics, R. C. Maclaurin, M.A., LL.D., Cambridge. These Professors arrived in the Colony at the end of March, 1899, and as soon as possible classes were organised and lectures begun.

The Staff has since been increased by the foundation of Chairs in Modern Languages, Biology, Roman Law, etc., English and New Zealand Law, Mental and Moral Philosophy, Physics, Education, Economics, History and Geology.

The College was admitted as an institution affiliated to the University of New Zealand on the 23rd February, 1899.

SITE AND BUILDINGS.

In 1900 an Act was passed whereby the College Council was empowered to acquire a site for the College buildings, being part of a town reserve situated on Salamanca Road, six acres in extent, and the Government provided £31,000 towards the cost of buildings. A portion of the buildings was erected, the foundation stone being laid by His Excellency Lord Plunket, K.C., V.O., on the 27th August, 1904. They were opened by His Excellency Lord Plunket on the 30th March, 1906.

In March, 1910, a further portion of the buildings was completed, forming a wing at the rear of the Arts Building. This wing contains two large class-rooms, and in the basement a men's cloak room, and common rooms for students.

In 1919, the Government made the College a grant for the completion of the north wing, the building of which is nearing completion. This wing, which should be ready for the 1922 session, will provide ample accommodation for the Library and

the new School of Economics, and a new Women's Common Room and a new Tea Room.

In 1921 the Government made a further grant for the erection of the South Wing, which it is hoped, will be ready early next session. This wing provides accommodation for the Physics and Geology Departments and will free additional space for Chemistry and Biology.

COLLEGE LIBRARY.

The College Library is maintained by an annual grant of £400 out of the College funds. At present it contains about 15,000 volumes, and subscribes for rather more than sixty periodicals.

In 1905, the College received from Parliament an additional annual grant of £2,000 for specialisation in Law and Science.

In 1914, the Victoria College Amendment Act was passed, by which it was enacted that the name of the College should in future be the Victoria University College. Changes were made in the constitution of the Council and of the Professorial Board. In the same year by an amendment to the New Zealand University Act an increase of £3,000 was made in the annual grant, and all the grants from the Government were consolidated into one annual grant of £9,000; further, the College was allotted a share of the National Endowment grant, part of which (amounting in 1921 to £1,708) comes direct from the Government, while a second part (amounting to 1921 to £853) is paid through the New Zealand University. Of this last sum £300 is set apart for Workers' Educational Classes.

In 1919, an amending Act to the New Zealand University Act was passed, in which it was enacted that from April 1st, 1920, the annual grant to this College should be increased by £2,500.

In 1915, the Trustees of the late T. G. Macarthy made a grant of £10,000, for the purpose of establishing a School of Economics, to be called "The T. G. Macarthy School of Economics." The foundation of the Chair was, however, delayed owing to the war. The Chair was founded in 1919 by the appointment of Professor B. E. Murphy, M.A., B.Com., LL.B.

In the same year, under the will of the late Sarah Anne Rhodes, the sum of £10,000 was left to the Council for the education of women.

In 1921 the Council arranged with the S. A. Rhodes Trustees to grant either a Sarah Ann Rhodes Fellowship, or a Sarah Ann Rhodes Scholarship, and alternative sets of regulations were drawn up. The first scholarship was awarded in 1921 to Miss Eleanor A. Pope, B.Sc.

BOTANY AND ZOOLOGY.

Professor Kirk.

Miss Piggott.

BOTANY.

It is essential that students should provide themselves with text-books, and should read fully and carefully. Every student should come to lectures with some ideas, and with notes as to the difficulties that his preliminary studies has not removed. It is part of the duty of the Professor to help him with these difficulties.

In both lectures and laboratory work due regard will be had to the University Syllabus, but work will not be confined to the syllabus.

Students that begin the University Course without any adequate training in Botany should take two years to reach the pass grade. In the time-table the lectures for the first year are marked J, those for the second year S. Those students that, with the consent of the Professor, treat the subject as a one year subject will attend both sets of lectures.

Text-Books—It is obligatory to have Parker's Lessons in Elementary Biology, Bower and Vaughan's Practical Botany for Beginners, and one of the following: Strasburger's Text Book of Botany, (3rd or later English edition); Miss A. S. M. Johnston's Botany, Mudge and Maslem's Class Book of Botany; or Bower's Botany of the Living Plant. It is very desirable, indeed almost necessary, that Senior students at least should have Dendy's Evolutionary Biology and Cockayne's New Zealand Plants and their Story.

Instruments—All students must provide with the following instruments at least, a razor for section-cutting, a pair of mounted needles and a pair of forceps with fine points. It is very desirable that every student should have a pocket lens. It is necessary also to have a laboratory drawingbook, with alternate pages ruled for notes.

Advanced and Honours Classes—The times for these classes are not in all cases definitely fixed. There will generally be two lectures a week and at least one discussions class a week. It is necessary that students attending these classes should have Strasburger's Botany and Dendy's Evolutionary Biology.

Students of Botany, whether formally attached to the College or not, may obtain from the Professor, permission to refer to the late Mr. T. Kirk's herbarium of New Zealand Flowering Plants, and to the late Dr. Knight's herbarium of Lichens (presented to the college by Mrs. Knight).

ZOOLOGY.

It is essential that students should provide themselves with text-books, and should read fully and carefully. Every student should come to lecture with some ideas, and with notes as to the

difficulties that his preliminary studies has not removed. It is part of the duty of the Professor to help him with these difficulties.

In both lectures and laboratory work due regard will be had to the University syllabus, but work will not be confined to the syllabus.

Students that begin the University Course without any adequate training in Zoology should take two years to reach the pass grade. In the time-table the lectures for the first year are marked J, those for the second year marked S. Those students that with the consent of the Professor, treat the subject as a one-year subject will attend both sets of lectures.

Text Books—It is obligatory to have Thomson's Outlines of Zoology, Marshall and Hurst's Practical Zoology and Marshall's Frog. It is highly desirable that every student should have also Dendy's Evolutionary Biology and Hewitt's House Flies and How they Spread Disease.

Advanced and Honour Classes—The general note under Botany applies here also. Honours Students must have Parker and Haswell's Zoology (2nd Edition), and should consult the Professor about other books.

Students should supply themselves with the following appliances:—A drawing book with alternate pages ruled for notes. Two pencils—one hard and one soft.
